Document Name: Team Definition of Done
Product Name: Restaurant Ordering System
Team Name: ROS

Task Workflow:

1. Code Compilation:
   a. Ensure that code compiles successfully on local environment without causing any errors.
2. GitHub Integration:
   a. Verify that when pushing code to the GitHub branch, there are no conflicts with existing code.
3. Collaborative Review:
   a. Before merging into the main branch, seek input from other team members by having them review the branch.
4. Organization:
   a. Organize the code in the designated areas as per the project structure.
5. Adherence to Style Guide:
   a. Confirm that the code follows the guidelines outlined in our style guide for consistency and maintainability.

User Story Completion:

1. GitHub Integration:
   a. Ensure all tasks are pushed to GitHub and successfully merged into the main branch.
2. Definition of Done (DOD):
   a. Validate that each task aligns with the Definition of Done, meeting the specified criteria.
3. User Story Functionality:
   a. Confirm that the user story functions as initially planned and meets the project requirements.
