Team Name: ROS
Andrew Song, Product Owner
Jeff Zhang, Developer
Ipsita Bisht, Developer
Rixin Li, Developer
Charith Velaga, Scrum Master
Eunbeen Hong, Developer
Sprint 3: 11/07/2023 - 11/21/2023
Sprint 3 Report: 11/21/2023

Actions to stop doing:
- Avoid making last-minute changes to sprint goals without proper evaluation and discussion with the team.
- Eliminate unnecessary meetings that do not add value or hinder productivity.

Actions to start doing:
- Institute a more detailed and organized sprint planning procedure to enhance predictability and ensure cohesive goal alignment.

Actions to keep doing:
- Keep updating on Discord since that helps with communication and understanding how well the sprint is going
- Keep meetings under 15 mintues
- Keep showing up on time
- We should cease spending time on low-priority tasks that do not directly contribute to our sprint goals.
- Eliminate unnecessary meetings that do not add value or hinder productivity.

Work completed/not completed:
Work completed:
- Submit orders and receive updated
- View order information and status
- Login authentication (sign in/up/out), edit self details
- Conditionally render website based on roles

Work not completed:
- Admins able to view personal details pertaining to online orders
- Admins can view history of user order

Work completion rate:
- Majority of user stories are completed in sprint 2.
- Spent on average 6 hours per a user story, sometimes a bit more due too debugging.
