Sprint 4 Report - Restaurant Ordering System

Team Name: ROS
Andrew Song, Product Owner
Jeff Zhang, Developer
Ipsita Bisht, Developer
Rixin Li, Developer
Charith Velaga, Scrum Master
Eunbeen Hong, Developer
Sprint 4: 11/11/2023 - 12/05/2023
Sprint 4 Report: 12/05/2023

Actions to stop doing:
- Avoid working towards the end of the sprint
- The team should stop showing up late for meetings as it will waste other members' time.

Actions to start doing:
- Make more frequent updates on the scrum board instead of just sending a pull request and not communicating after that
- Have a schedule planned out especially since working on a sprint near a sensitivity week with tons of blockers

Actions to keep doing:
- Keep updating on discord since that helps with communication and constantly checking up with others

Work completed/not completed:
Work completed:
- Frontend: Show menu items for Popular Menu Items and display in landing page
- Frontend: Display Total Orders, Number of guest served, Average Customer spending in admin dashboard

Work not completed:
- Bookmarking items, view them or make comments on item
- Customers can schedule and manage deliveries
- Backend: Displaying Total Orders, Number of guest served, Average Customer spending in admin dashboard
- Backend: Show menu items for Popular Menu Items and display in landing page

Work completion rate:
- Fix Errors and bug in menu
